

Your Reliable Service Solution for Industrial Valve Maintenance

Land & Sea
Valve Services

Land & Sea will repair your valves correctly and on time, every time. Our goal is to exceed your service expectations.

Our staff takes pride in guaranteeing that your valves are fixed correctly and that all regulatory and industry specifications are met, with delivery and turnaround you can rely on. From our certified valve technicians, instrumentation and calibration techs, to our dedicated engineers, planners and expeditors; we have a diversified staff that collectively works together to provide our clients with the best service in the industry.

Land & Sea can meet all of your valve repair needs.

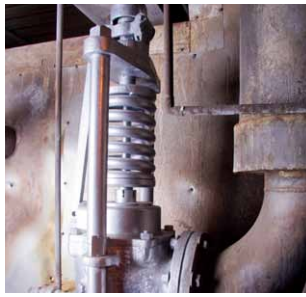

We maintain a modern repair and testing facility, with the capability of repairing all types, sizes, brands and configurations of industrial valves, including certified air, gas, liquid and steam testing. We maintain an independent service facility and foster relationships with all manufacturers so that we can provide our customers with the best solution every day.

Land & Sea will come to you whenever and wherever you need us.

We provide the highest quality shop and field service capabilities 24 hrs/day thanks to our modern shop and portable test equipment, in-situ valve testers, site and offshore workshops.

Our valve management service (VMS) programs allow customers to focus their efforts on their business and not on valve maintenance.

We offer customized valve maintenance management programs, including repair and certification, predictive maintenance planning, spares and parts inventory management, and procurement services. This allows our customers to concentrate on their primary business objectives and not on valve repair and inventory tracking.

Pressure Relief Valve Repair & Testing

VR Certified by the National Board
of Boiler & Pressure Vessel Inspectors
